

What makes us different Highlight #5

Digital Photo Preview

No place else will you get to see a custom digitized photo preview of how your finished project will look! We take a photo of the original area and work the colors or finishes into the scene. You get to approve a visual of your project before work begins.

In this **Digital Design Preview**, the customer wanted to make the fireplace stand alone, but in a subtle manner, as well as enhance the entire home. I suggest removing the extra tile to isolate the fireplace, and continue the tile feel with a Venetian Plaster marble finish over the fireplace. The overmantle is further enhanced with a Painted Trompe Loeil Medallion. The rest of the walls are glazed in one color to enhance the skip-trowel texture. All design was approved before work began.
